BATTLESHIP LINOLEUM

(DOUBLE-WAXED)

Battleship Linoleum, manufactured to conform to standard specifications of the U. S. Navy, must pass regulation tests for pliability, density, elasticity, resistance to moisture, etc. As a result of extra processing employed in a unit of the Sloane-Blabon Corporation it has been found possible to produce Battleship Linoleum of a quality that is far in excess of the U. S. Navy standards, without increasing the manufacturing cost. (Resumé of tests on page 56.)

The natural lustrous finish of Sloane-Blabon Battleship Linoleum is largely due to the high grade ingredients used, combined with the improved method of manufacturing. A double-wax finish is applied at the factory, making the lustrous film a component and adherent part of the fabric and eliminating the need of surface treatment after installation.

Sloane-Blabon Battleship is manufactured in the following gauges and colors:

Heavy Weight—(6MM) Brown, Green, Gray, Terra Cotta

Medium Weight—(3/16 in.) Brown, Green, Gray, Black, Terra Cotta

Light Weight—Brown, Green, Gray, Black, Terra Cotta

The use of Sloane-Blabon Battleship in many of the country's finest buildings attests its high quality, beauty and durability.

PLAIN LINOLEUM

(DOUBLE-WAXED)

Similar to Battleship in finish, but lighter in weight, Sloane-Blabon Plain Linoleum is manufactured by processes which insure maximum quality and long wear. The double-wax finish applied at the mill eliminates the need of primary surface treatment after installation. Recommended for contract work.

Made in the following gauges and colors:

B-Gauge—Brown, Light Green, Dark Green, Gray, and Black

C-Gauge—Brown, Light Green, Dark Green, Gray, Black, Blue

D-Gauge—Brown, Light Green, Dark Green, Gray, Black, Blue

JASPÉ LINOLEUM

(DOUBLE-WAXED)

In finish, Sloane-Blabon Jaspé is similar to Battleship and Plain Goods, but has a two-toned effect instead of solid colors, offering exceptional possibilities for Contract work. Jaspé is double-waxed at the mill, and embodies long wearing quality. Made in:

3/16 Gauge—Brown, Gray, Green

A-Gauge—Brown, Green, Gray, Sand, Taupe, Peach, Apple Green

B-Gauge—Brown, Green, Gray, Black, Peach, Sand, Taupe, Apple Green

CORK CARPET

Particularly suited for libraries, churches, hospitals and other buildings, where quiet is an essential requirement and exceptional resiliency is desirable. Made in 1/4″ Brown and Green, polished or unpolished.

Samples of these contract grades of Sloane-Blabon manufacture will be furnished upon request.

TABLE OF GAUGES AND WEIGHTS

(Shipping Weights)

NOTE: The gauges shown are subject to an allowable variation of .005 inches over or under the figures given. For purposes of figuring freight the average weight of crated rolls will answer all practical purposes, subject to slight variations due to differences in length of roll and to the weight of the crate.

Grades	Finished, inches	Gauge M M.	Nearest fraction inch	Average weight of roll crated, pounds	Average weight of sq. yd. crated, pounds	Square yards to roll
BATTLESHIP LINOLEUM—(Double-Waxed)—2 yds. wide						
Heavy Weight (6mm)—U. S. N. Standard	.236	6.00	15/64	811	13.5	60

ANALYSIS SHOWS SLOANE-BLABON BATTLESHIP LINOLEUM EXCEEDS GOVERNMENT STANDARDS

The following partial analysis of tests made by the Pittsburgh Testing Laboratories of 6 MM. Battleship Linoleum manufactured by a unit of Sloane-Blabon Corporation indicates the high standard of this linoleum in comparison with Government Specifications.

	United States Government Specifications	Sloane-Blabon 6 mm. Battleship	Excess Quality
Weight	Government says weight 1 sq. yd. of 6 mm. Battleship Linoleum should be 10.50 lbs.	Sloane-Blabon 6 mm. Battleship Linoleum weighs 13.50 lbs. per sq. yard.	17.4%
Uniformity	Government states linoleum should be even in thickness throughout entire goods. Government specifications allow a variance of .010 in.	Sloane-Blabon 6 mm. Battleship Linoleum varies only .004 in.	150%
Adhesion	Government specifies that a pull of 6 lbs. be required to separate burlap from linoleum.	Sloane-Blabon 6 mm. Battleship Linoleum requires a pull of 17 lbs. to separate burlap from linoleum.	183%
Absorption	If linoleum is left in water for 24 hours and absorbs much water it shows that it is not compact enough to resist dirt, dust, etc. Government allows an absorption of 2.5% of the weight of the linoleum. 1 sq. yd. of linoleum weighing 15 lbs. may absorb over 5 oz. of water and pass the test.	Sloane-Blabon 6 mm. Battleship Linoleum under this test absorbs less than 3 oz. of water.	66⅔%

(In all instances Sloane-Blabon 6 mm. Battleship Linoleum more than meets United States Government Specifications.)

Suggestions on the Laying of Linoleum

The life and appearance of a linoleum floor depend largely on the care with which the linoleum is laid. We recommend that experienced workmen be employed, especially if Battleship Linoleum is to be installed.

The floor of each room to be covered should be measured carefully to determine the method of laying which will insure the minimum number of seams and the least waste of material. Seams should run along lines of greatest traffic.

In order to give most efficient service linoleum should be cemented to the floor. Be sure the floor is smooth and free from sharp projections or large cracks. On wood floors the high spots should be planed down, and any large cracks filled with putty. An irregular floor surface will cause excessive wear on the uneven places and may cause the linoleum to crack. Linoleum should not be laid on green, unseasoned wood, or uncured cement. If laid on a green wood flooring the contraction which takes place in the wood as it seasons may crack the linoleum. A cement floor should be at least three months old before applying linoleum. The moisture in an uncured cement floor is apt to rot the burlap back.

The use of lining felt is recommended when linoleum or cork carpet is laid over wood floors. The felt absorbs the seasonal expansion and contraction of the boards, prolongs the wear and increases the resiliency of the linoleum. Felt is not absolutely essential over concrete floors, but it insures better adhesion, smoother surface, greater resiliency, and makes it possible to take up and re-lay the linoleum without damage.

Apply linoleum cement evenly and smoothly to prevent the formation of air blisters, which cause the linoleum to bulge. The 6 ft. widths of linoleum are laid parallel to the long side of the room. Plain colors of Battleship are laid so that the joints lap, making an almost invisible seam. In laying patterned linoleum, the edges must be butt-jointed. A 150 lb. roller should be used to roll out any air bubbles which may have formed. The joints require special attention, and the use of sandbags or weights on the joints and edges is generally advisable where there are long seams.

The Care of Linoleum

The maintenance of linoleum has been carefully studied by Sloane-Blabon laboratories with the view of outlining the most efficient way of caring for linoleum. Wax an Inlaid, Battleship, Plain or Jaspé linoleum floor from two to four times a year, depending on the amount of traffic. The waxing will not only give the floor an even finer appearance, but will give it longer life.

Wax provides a smooth film over the surface of the linoleum to which dust does not readily adhere. When a linoleum floor is properly waxed, cleaning becomes only a matter of using a floor brush occasionally to remove dust, or at infrequent intervals, a damp mop.

Should scrubbing become necessary, use only a good pure soap which is free from alkali, scouring compounds and grit. Abrasive scouring agents are especially injurious to printed linoleums and felt-base. After a linoleum floor has been washed, do not wax until thoroughly dry.

Equip heavy furniture with flat glass or metal shoes. Roller casters are apt to cut the surface. These simple precautions will result in longer life and lasting beauty for your linoleum floors.

YARDAGE CALCULATOR

This table gives an *approximate* estimate of the number of square yards of smooth-surface floor-coverings required for rooms of various dimensions, with due allowance for waste. Please bear in mind, however, that for purposes of matching, these measurements will vary slightly according to the design used.

Size of Rooms in Feet	Square Yards Required	Size of Rooms in Feet	Square Yards Required	Size of Rooms in Feet	Square Yards Required
6 x 6	4¼	10 x 17	20¾	15 x 22	37¾
6½ x 6½	5	11 x 11	15½	16 x 16	30½
7 x 7	6	11 x 12	16½	16 x 18	34¼
7½ x 7½	6¾	11 x 14	19	16 x 20	37½
8 x 8	7¾	11 x 15	20½	16 x 24	45¼
8½ x 8½	8¾	11 x 16	22	17 x 17	35¼

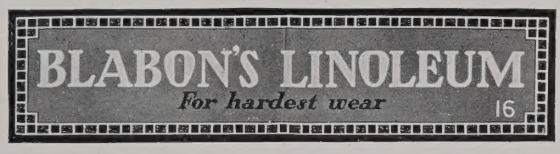
Selling Helps For Sloane-Blabon Dealers

To help the retail merchant sell more goods is the object of all Sloane-Blabon Linoleum advertising. At the time this catalog goes to press we have not outlined complete advertising plans for 1932 and can therefore give only a limited list of the publications in which Sloane-Blabon advertisements will appear during the first six months of the year. Many of the advertisements will appear in color in the following publications, which have very wide coverage in both the dealer and contract fields:

American Architect
Architectural Forum
Pencil Points
Sweet's Catalogue
Nation's Schools
Chain Store Age
Extension Magazine
Building Investment
Rug Profits
Furniture Reporter
Furniture Index
Buildings and Building Management
Modern Hospital
Carpet & Upholstery Trade Review

It is anticipated that a powerful consumer advertising campaign may be inaugurated during the last half of 1932. Further details will be announced at a later date.

Additional direct sales-compelling material is furnished free of charge to merchants handling Sloane-Blabon merchandise, in the form of newspaper matrix services, attractive window displays, store signs, window pasters, envelope stuffers, colorful letterheads, trade mark hangers, educational pamphlets, blow-up cards, et cetera. These dealer helps are illustrated or described on this and the following page. Requests for these materials forwarded to W. & J. Sloane, Advertising Dept., 577 Fifth Avenue, New York, will receive prompt attention. All dealer helps are free of charge.



Above—No. 16. Colorful lithographed Window Banner. 36 inches long by 8 inches high.

At right—Novel Map Display. Background consists of large map of the world. Separate cards attached by ribbons run out from the countries which produce the raw materials used in linoleum. This display always attracts interest. Size 5 feet by 3½ feet.

Window Card Set No. 17

Consists of three cards in full color depicting attractive room arrangements. Large card 22"x30"—small cards 17"x26".

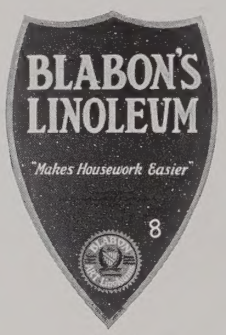
Embossed Window and Store Sign

Has appearance of solid bronze. Gold letters on black background. Easel back. 13" wide.

Selling Helps For Sloane-Blabon Dealers

Imprinted Envelope Stuffers
A series of stuffers, each one on a single grade of linoleum, for your own effective direct mail campaign. Printed in full color. Imprinted with your name free of charge, in reasonable quantities.

No. 61—Giant Display Card
Impressive "Blow-up" window or department card, in full color.



No. 8
Blabon Shield Hanger
Colorful shield for window or display room. 27″ high by 18″ wide.

No. 60—Giant Display Card
A distinctive, colorful "Blow-up" Display. Very attractive.

No. 20—Three Panel Cut-Out Display
Size: 3 feet high by 4½ feet long. Compels attention to your window.

No. 7—Blabon Trade Mark Hanger
Colorfully lithographed. 8″ in diameter.

No. 21—Window Pasters
Novel and highly colored. Set of three sent free of charge.

OTHER MERCHANDISING AIDS—ALL FREE

NEWSPAPER ADVERTISING SERVICE
Now in preparation—an attractive portfolio illustrating free mats and electros for your newspaper advertising, with suggestions for timely store promotions. Write for your copy.

LAYING CUT-OUT DISPLAY
Large educational floor display showing how linoleum is laid.

INSTRUCTION BOOK—No. 32
Tells the complete story on the manufacture of linoleum. Informative and helpful.

FLOORTEX METAL SIGN—No. 22
An attractive floor or window sign enameled in red, black and gold.

ARCHITECTS DATA BOOK
A helpful specification book for contract work.

FLOORTEX RUG WALL CHART
A large wall chart (size 28″x48″) showing 26 Floortex Felt-Base Rugs in full color. This invaluable chart is free of charge.
